

DECLARATION

We Datecs Ltd., as a manufacturer of the Fiscal Cash Registers "DP-05", "DP-25", "DP-35", hereby declare that all devices supplied on the territory of Republic of Kosovo fulfill the following requirements:

1. Each quoted model provides functions for generating periodic reports from the Fiscal memory if:
 - a) The value of the accumulated turnover for each of the VAT Groups for the period is not greater than 199.999.999.999, 99;
 - b) The value of the accumulated total turnover is not greater than 199.999.999.999, 99;
2. Each quoted model (if it uses an Electronic Journal) provides writing of any information into the electronic journal memory with "reading after writing" method to certify that the data has been saved correctly. If the record in the electronic journal is corrupted the FED blocks the registration mode.
3. Each record, which is stored in the fiscal memory in any of the quoted models, has a fixed block structure with check sum. The check sum guarantees that the data in the block is not changed. Each writing in the fiscal memory is followed by reading and confirmation of that the data has been saved correctly. If a mistake is found in the record, the FED blocks the registration mode.
4. Each quoted model has incorporated clock and calendar. It is allowed each of them to be programmed from the keyboard. The clock and calendar are capable to keep the right date and time for at least 1500 hours without external power supply.
5. Each quoted model has incorporated non volatile memory module (with a back up battery), which permits data registered in it, to be unchangeable if FED is not connected to external power supply for at least 1500 hours.
6. Each quoted model is able to operate in temperature range 0° - 40°C.
7. Each quoted model and Tax Terminal fulfil EMC, LVD, vibrations, temperature and safety requirements according to CE mark and other EU standards for similar equipment.

This declaration has to be used during Functional and Technical Tests of quoted devices.
